Ok Just let me know when you leave in the morning. And call maybe when you get to Vincennes. I can start gauging when you'll be getting to the exit. I think day one we'll do the OW5 and OW6 which is proposed for flood retention and crossing proposed. Then they can take you to the Hig Pointe side and see what you want to see over there.

The next morning we can dive into the west side.

We will see you there, there will be just 4 of us and we do have a vehicle with 4x4.

List of areas to see

Northern Portion of the site. PFO1, I believe we can access the Northern Portion via Greenbrier Road. Would also like to see Pigeon Crk (aka stream 11 aka the Wabash Erie Canal) in that this Northern Portion of the site. Would like to see the area proposed for impact and the 900 ft proposed buffer.

Along the Western Edge would like to see the project limits and where PF01 extends off site in two area along stream 1 and stream 2 downstream of stream monitoring point 2180.

Area between OW5 and OW6 which is proposed for flood retention and then later proposed as areas of PFO mitigation wetlands.

The two proposed crossings over Pigeon Creek.

Let us know if there are other area you think we should see, or if there won't be time to see all the ones listed above.

If you need to get a hold of us on Monday morning call my cell 330-46-8513, I will also have my office number forwarded to my cell.

OK sounds good.

On the way down I'll meet you at the Boonville-New Harmony ext off of I-69/I-164. Site is just down the road about 4-5 miles I'm guessing.

George,

I would adjust but I have commitments later in the week, and the two following weeks are full so I can't rearrange. We will make the most of it.

I am trying to get the keys on Friday, so we can leave a little earlier on Monday. I will just need more coffee. I will call when we are two hours out. Then we you need to head out, the UMC folks can take us to High Pointe.

Tuesday 8 am is fine and we will do as much as we can. KerryAnn is with Dave Carr now in Indy discussing it while at another meeting. I will have you the list of what to see by the end of the day.

Working on cumulative and secondary impacts now starting with all the permits in the watershed as listed in ORM2 (see table below for ones that may be related to coal mining). I also found the JDs files numbers for these mines Lynnville, Eby, Cypress Creek Coal Mine, and Elberfeld. Will let you know next week if there is any information that we may need.

Hey

Just an update for next week. As I already told you I am a single Dad for the first half of the week next week as my wife has some Grand Jury stuff she has to do out of town for a few days. As such I cannot

stay with you guys much past 3 o'clock on Monday. Unfortunately, Rob is on leave next week also, so he will not be able to take you over to High Pointe. Also, Tuesday morning, I will have to my boys to school and then my daughter to hers. Basically that means that I will not be at the office till about 8:00 am. If that is early enough for you then great. If not well we'll have to figure out something.

So here is a couple options I guess. We can push forward and for the High Pointe stuff you can just go with the UMC folks after I leave. Or you can push back the visit a day or two then I can be present for all of it. Sorry about this but these are things outside of my control so...
